About

Backend Developer focused on Java and Spring Boot. Experience with REST APIs, SQL databases, and security fundamentals. Seeking my first professional opportunity to continue growing as a backend developer.

Skills

Backend: Java, Spring Boot, REST APIs, JWT Authentication (basic), SQL (MySQL / PostgreSQL), MongoDB

Tools and practices: Git / GitHub, Maven / Gradle, API Documentation (Swagger / OpenAPI), Clean Code Fundamentals

Additional knowledge: Basic frontend knowledge (React), Basic Linux and terminal usage, Docker (basic)

Languages: Spanish (native), English (A2 - Lower intermediate)

Projects

Auto-Contact

- Android app with React Native / Expo that syncs contacts from a REST API to the device address book, creating only new contacts.
- Modular architecture with composite hooks; REST integration with sequential pagination and deduplication.
- Multi-channel auto-sync (foreground, background, and on app resume); in-app settings with AsyncStorage persistence, Jest tests, and EAS build.

Experience

Focs d'Artifici Camp del Turia S.A.U., Pyrotechnic Operator

Casinos, Valencia, Spain

- Preparation, handling, and safe assembly of pyrotechnic products.
- Strict compliance with safety standards and legal protocols.
- Inventory management of specialized materials and tools.

Aug 2023 – present

Education

Bachelor - Computer Science Engineer, (Homologated in Spain)

Havana, Cuba

University of Computer Sciences [🔗](#)

Sept 2017 – Nov 2022
